Internship Training Report

Anurag IT Solutions

Name	Indigapalli Anusha
PIN Number	24255-CM-071
Branch	Computer Engineering
College	Aditya Engineering College, Surampalem
Organization	Anurag IT Solutions
Date	August 4, 2026

Training at Anurag IT Solutions

About the Organization

Anurag IT Solutions specializes in IT training and software development, with a strong focus on practical web and programming skills for aspiring engineers.

Skills Developed

HTML · CSS · Bootstrap · Python · SQL

Task Completed

Developed webpages and learned fundamentals of programming and databases.

Training Objectives

- 01 Learn modern web development technologies
- 02 Gain practical programming experience
- 03 Understand responsive design principles
- 04 Improve analytical problem-solving
- 05 Build confidence through hands-on assignments

Technologies Learned

Five foundational technologies covered during the internship — spanning structure, style, responsiveness, programming, and data.

HTML

Structure

CSS

Styling

Bootstrap

Responsive

Python

Programming

SQL

Databases

Together, these technologies form the essential toolkit of a modern full-stack developer.

HTML — HyperText Markup Language

Definition

The standard markup language used to create the structure of webpages.

Importance

The foundation of web development, universally supported across all browsers.

Uses

Building webpages, displaying text and images, adding links, and creating forms.

EXAMPLE

```
<!DOCTYPE html>
<html>
  <head>
    <title>My First Page</title>
  </head>
  <body>
    <h1>Welcome</h1>
```

Output: A page showing a “Welcome” heading and a “Hello World” paragraph.

Task: Created basic webpages and learned the underlying document structure.

CSS — Cascading Style Sheets

Definition

A stylesheet language that controls the appearance and layout of webpages.

Importance

Makes websites visually appealing, consistent, and responsive across devices.

Uses

Changing colors, fonts, spacing, layouts, and adding smooth transitions.

Common Properties

color · background-color · font-size · margin · padding

EXAMPLE

```
body { background-color: lightblue; }  
h1   { color: navy; }  
p    { font-size: 20px; }
```

Output: A light-blue page with a navy heading and 20px body text.

Task: Styled webpages with custom colors, typography, and responsive layouts.

Bootstrap

Definition

An open-source CSS framework for building responsive, mobile-first websites.

Importance

Saves development time and delivers a professional, consistent UI.

Uses

Grid layouts, navigation bars, buttons, cards, and form components.

Common Classes

container · row · col · btn btn-primary · card

EXAMPLE

```
<div class="container">
  <h2 class="text-primary">Welcome</h2>
  <button class="btn btn-success">
    Click Me
  </button>
</div>
```

Output: A blue heading with a green button in a responsive layout.

Task: Built responsive pages using Bootstrap grid and components.

Python

Definition

A high-level, interpreted programming language known for its simple syntax.

Importance

Easy to learn, highly readable, and versatile with a vast library ecosystem.

Uses

Web development, data analysis, AI, automation, and application scripting.

Concepts Learned

variables · data types · input/output · operators · conditions

EXAMPLE

```
name = "Anusha"  
print("Hello", name)
```

Output: Hello Anusha

Task: Wrote small programs applying variables, operators, and conditionals.

SQL — Structured Query Language

Definition

A language for managing and querying data in relational databases.

Importance

Enables efficient, secure data storage, retrieval, and manipulation.

Uses

Creating tables and inserting, selecting, updating, or deleting records.

Basic Commands

CREATE · INSERT · SELECT · UPDATE · DELETE

EXAMPLE

```
SELECT * FROM Students;
```

Output: Displays every record from the Students table.

Task: Wrote basic queries for common database operations.

Conclusion

A rewarding internship that transformed classroom concepts into real-world capability.

01	Practical Knowledge	Gained hands-on experience in web development and programming.
02	Full-Stack Skills	Developed working skills in HTML, CSS, Bootstrap, Python, and SQL.
03	Real Assignments	Completed live tasks — building webpages and small programs.
04	Problem Solving	
05	Next Steps	Ready for continued professional advancement in software development.

Thank You

Questions and Feedback Welcome
